I was not able to play Air Buccaneers for very long since like other countless games in my steam library that dislike working. The short amount of time I did manage to play it is a very interesting and what could've been an enjoyable game, I can see teamwork playing heavy on this game with the need to communicate the way the ships facing and where targets are. My only problem is that gameplay with the cannons is very slow and clunky, aiming is a hit and miss procedure with 0 guide on how to aim and having the aim offset a bit throws off your aim.

Tl;dr could've been good back in the day.. idk never played. It not really a horror game. more of a basic puzzle game, which I will say is I didn't beat it I just played some it and got off. but I still recommend it. It's also a old prototype if you couldn't tell by the title. That's all I've got to say.. I have just bought Aerofly FS 2 - Switzerland.

This is in my FS-2 library.

But it's not in my FS 2 scenery.

So I can not fly on Switzerland

What can I do about that?

. No Co-op, trouble-shooting is necessary in order to play the game. Game play and story-line is excellent. Very simple puzzles, mostly a walking sim with a somewhat nonsensical narrative.. Midnight Quest is a fun point and click adventure that has you solving puzzles in an effort to repair a time machine and save the scientist and robot in a lab. Now as someone who isn't terribly bright, I found the puzzles to be just challenging enough to make me think but not so difficult as to beat my head against the wall.

The art style gives me a very Scribblenauts kind of vibe. But at times some of the items are slightly difficult to tell exactly what they are and with no text descriptions, you may have a slight bit of trouble initially identifying them. But nothing too bad.

This is an easy recommend because it's pretty cheap and moreso, it's fun if you're into point and click games. So give it a shot!

[Controller support is broken. Refund requested.. do not buy the cossacks searies your wasting your money as these will not work on windows 10 steam needs to sort this mess out](#)

I LOVE this game. Yup some bits of the story feel rushed and we have a few loose ends here and there but the experience is overall really good.

Once again, the pixelart is just great, the music is even better, exploration wise, eventhough it's a somewhat short game, there is quite a lot for you to explore and discover. The story is interesting but some bits feel missing, some enemies show up a bit too late in the game to my taste but I still love it. Lovely characters, great humor, it feels less creepy than Count Lucanor imo.

I bought this game the very day it came out, I regret nothing! I had tons of fun playing it.

I'm honestly looking forward to hear more from Baroque Decay.

I highly recommend it.

Sosa is love, Sosa is life!. great game for 3\$. Just horrible. Spent what seemed like a year of my life just trying to get the bus ready to drive off. Then when I did get it moving it started bouncing off objects like it was on some sort of schizophrenic pinball table.

Be warned; If you gift this game to a friend you will lose them forever.

+ It's not the worst game in the world

- The first 10 minutes will make you want to uninstall immediately
- Level of realism let down by poor visuals and laggy movement. Holy poop on a stick! This game is awesome! I love "dungeon" type of games, and this is my favorite in VR. The atmosphere in Dreadhalls is spot on -- super creepy without being gory. I've played other "scary" VR games, but this is the first one that literally had me running into a wall (seriously, I physical ran into a wall trying to get away from a monster) and, at another point, had me say out loud "I'm done" and then rip the Vive off of my head in terror. I love this game and, when it is nice and bright outside, I'm going to give it another go.. Im really lost, but i like this.. I'm a big sci-fi fan, I really wanted this to be good. Unfortunately it isn't, have a look:

-Short and fast paced.

-No character development and too many characters. I had no attachments to anyone.

-Half a dozen alien races, poorly described. Again no attachment to anyone.

-Battles have no consequences and are way too easy. For example: aggressive tactics or passive tactics, fighters or cannons. You have 4 options, but you just pick your highest stat and win easily. No twists or surprises, no repercussions.

-The story itself is bland and predictable.

-There's alot of choices where it asks how do you feel about your choice, what do you think others think of you. It adds nothing to the story or your stats.

-It doesn't challenge you to try to get a good ending. You just decide what ending you want.

Overall:

-I think you should skip this one. It needed to be longer and do more.. Extremely well done!. Pleasant graphics, good variety of mechanics and environments, and tons of fun with friends. For only 10\$ I'd definitely recommend it.. I liked the game, but I managed to get it for \$2.00.

The controls could use some work. There are tracks that are bad enough to get the a.i. stuck or going in the wrong direction. There's no online multiplayer. There's only 4 cups with 4 tracks per cup. There's only one difficulty. The menus have bad controls, sometimes you can use your controller, sometimes you can't.

Considering the base price is \$20, its a better idea to buy Sonic and All Stars Transformed.

. This game looks much more fun than it plays. nothing more, nothing less: it really is just unenjoyable. lasers are slow, robot drones in the sky you bat lasers at, enemies that mindlessly march toward you and your laser swords that die with a touch... it's just not fun to play.
